

Q5:

$$1/ \text{ Payment} = \frac{\text{intRate} * (\text{principal} / \text{payper year})}{1 - ((\text{intRate} / \text{payper year}) + 1) ^ \text{Num year} - \text{payper yea} * \text{Num year}}$$

2/Correct the code and get the out put:

```
#include <iostream>
using namespace std;

int main () {
    int rows;
    cout << "Rows for pattern: ";
    cin > rows;

    for (int i = 1; i <= rows; i++) {
        for (int j = 1; j <= rows - i; j++)
            cout >> " ";
        for (int j = 1; j <= 2 * i - 1; j++)
            cout << "@";
        cout << endl;
    }
    return
```

1\ Solve the problem $Z = e^{2x} + \sqrt[3]{\sin y + \cos y}$

2/4

2\ Write program that swap two numbers $a=2, b=4 \Rightarrow a=4, b=2$

Q3:

Match the Right answers:

which data type is used to create a variable that should store text	String
Where does a C++ program begin execution	Stands for valueless.
What is void?	Must)
Must a variable be declared before it is used	yes
Can more than one variable be declared in a single declaration statement	None of these
	No

Q4:1/Write the Output

	Output
<pre>#include <iostream> Using namespace std; int main() { int m=20, r=50; cout << m << endl; cout << " r++ * --m = " << r++ * --m << endl; cout << ++m - ++r + m--; return 0; }</pre>	

2/write program that print the grade of student(A,B,C,D,F) by using switch?

Q1:a/ Write program that print the Maximum and Minimum numbers by using 1D Array.

b/ 1/ How to write a Comment in C++?

2/ Compare between while , do-while and for loops by using example that print the odd numbers ?

Q2:

1\ Solve the problem $Z = e^{2x} + \sqrt[3]{\sin y + \cos y^3}$
